Dr. Sasidhar Participated as Instructor

The COLS Training Program was conducted on 25th February at Kollam, where a memento was presented to Dr. Ajayakumar in the presence of the Finance Minister of Kerala.
The Minister inaugurated the program by performing COLS, and a special training session was also held for NSS students.

The session “Critical Care Conversations – Indian Perspectives” by Dr. Yash Javeri and Dr. SSC Chakra Rao highlighted the evolving landscape of resuscitation and critical care education in India through the initiatives of the Indian Resuscitation Council Federation (IRCF). The speakers emphasized the importance of structured, practical, and India-specific CPR training that can reach healthcare professionals as well as the general public. They discussed how teamwork, communication, simulation-based learning, and continuous skill reinforcement are essential for improving patient outcomes during emergencies. The conversation also explored the need for leadership development, ethical practice, and system-based approaches in critical care rather than relying solely on individual expertise. Special attention was given to empowering nurses, paramedics, and young doctors as equal partners in resuscitation efforts. The session concluded with a vision of creating a nationwide culture where every citizen is trained and confident in lifesaving skills.
